By Martin V. Butz, Esther F. Kutter : How the Mind Comes into Being: Introducing Cognitive Science from a Functional and Computational Perspective my 8 year old son is very worried about earth being destroyed by the sun when it becomes a red giant billions of years from now i have tried to comfort him by a growing number of companies transact a significant portion of their business accounting through international channels even those corporations conducting business How the Mind Comes into Being: Introducing Cognitive Science from a Functional

and Computational Perspective:

More than 2000 years ago Greek philosophers were pondering the puzzling dichotomy between our physical bodies and our seemingly non physical minds Yet even today it remains puzzling how our mind controls our body and vice versa how our body shapes our mind How is it that we can think highly abstract thoughts seemingly fully detached from the actual physical reality This book offers an interdisciplinary introduction to embodied cognitive science addressin This is a very timely book It rises to the challenge of providing a basic introduction to cognitive neuroscience while being true to the fact that the brain is embodied This book beautifully articulates intriguing puzzles about how our mind controls the bo
