2 of 2 review helpful Simple to read and comprehensive By Evgeniy Gavrilov It is a great compendium of causation

The only think which is lacking is the representation of the eastern thought on the subject especially the Buddhist approach to causation described in Patthana Conditional Relations being the 7th book of Abhidhamma a must for a serious causation scholar 4 of 4 review helpful Causation is a central topic in many areas of philosophy In metaphysics philosophers want to know what causation is and how it is related to laws of nature probability action and freedom of the will In epistemology philosophers investigate how causal claims can be inferred from statistical data and how causation is related to perception knowledge and explanation In the philosophy of mind philosophers want to know whether and how the mind can be said to have c About the Author Helen Beebe is Professor of Philosophy at the University of Birmingham Christopher Hitchcock is Professor of Philosophy at the California Institute of Technology Peter Menzies is Professor
