Corey W Dyck presents a new account of Kant's criticism of the rational investigation of the soul in his monumental Critique of Pure Reason in light of its eighteenth century German context. When characterizing the rational psychology that is Kant's target in the Paralogisms of Pure Reason chapter of the Critique, commentators typically only refer to an approach to and an account of the soul found principally in the thought of Descartes and Leibniz. One can learn much from this careful study which I recommend to all students of Kant but especially to those who have neglected the intellectual context of Kant's developing thought. *Journal of the History of Philosophy*
