Descartes; Cartesianism Rationalism Foundationalism Doubt and Certainty Dream Argument Cogito Ergo Sum Trademark Argument Leibniz, Husserl and the Brain:

This book is about structural relations between phenomenological and neurophysiological aspects of consciousness and time. Focusing on auditory perception and making new and updated use of Leibniz and Husserl, it investigates the transition from unconscious to conscious states, especially with regard to the constitution of phenomenal time. Sieroka has developed a kind of empirically informed Husserlian-Leibnizian parallelist account of perceptual and physiological phenomena. He develops his views with great rigor and in many passages brings to bear his perspective on current de

Personalism Personalism is any philosophy that considers personality the supreme value and the key to the measuring of reality. Its American form took root in the **epub** consciousness. Explaining the nature of consciousness is one of the most important and perplexing areas of philosophy, but the concept is notoriously ambiguous. **pdf** Philosophy is the systematic study of the foundations of human knowledge with an emphasis on the conditions of its validity and finding answers to ultimate questions. Husserl paid particular attention to how sciences, both human sciences and natural sciences, are built as intellectual products and how they know their objects.
