Theravāda Buddhist Encounters with Modernity (Routledge Critical Studies in Buddhism):

Although recent scholarship has shown that the term 'Theravada' in the familiar modern sense is a 19/20th century construct it is now used to refer to the more than 150 million people around the world who practice that form of Buddhism. Buddhist practices such as meditation, amulets and merit making rituals have always been inseparable from the social formations that give rise to them, their authorizing discourses and the hegemonic relations they create. About the Author: Juliane Schober is Professor for Religious Studies and Director of the Center for Asian Research at Arizona State University, US. Steven Collins is Chester D. Tripp Professor of Humanities at the University of Chicago.
